Relaying card
CN901

V1.0

Jan 2018

Connector: RJ45

Supply voltage: +110-220V, 50/60HZ (electric transformer is embedded)

Indicator status:

The No.1 LED indicates signal of the network port next to the LEDs;

the No.2 LED indicates signal of the network port farther away from the LEDs;

the No.3 LED indicates power.

Usage: To extend the signal transmission distance between sending and receiving card. Usually one relaying card can extend 100meters.
